Benefits of Organic Medjool Dates

1. Chemical-Free Nutrition

Grown without pesticides, herbicides, or GMOs. No artificial preservatives or sulfites. Safer for long-term health and better for the environment.

2. Maximum Nutrient Retention

Being raw means they're unheated and minimally processed, preserving:

Enzymes that aid digestion.

Vitamins (like B6, K) and antioxidants.

Minerals (potassium, magnesium, iron, copper).

3. Superior Antioxidant Power

Raw and organic dates contain higher levels of polyphenols and other antioxidants.

Help combat inflammation, cell damage, and support brain health.

4. Excellent for Gut Health

High soluble fiber content encourages:

Regular bowel movements.

A healthy gut microbiome.

Lower risk of digestive disorders.

5. Heart and Energy Booster

Rich in natural sugars, but with a low glycemic index. Great for sustained energy and stable blood sugar levels.

Potassium and magnesium support healthy blood pressure.

6. Environmentally Friendly

Organic farming practices protect soil, water, and biodiversity.

Ideal for eco-conscious consumers.

VITAMINS IN DATES

Dates contain 6 essential B vitamins:

Thiamin

Niacin

Riboflavin

Biotin

Vitamin B6

Pantothenic Acid

MINERALS IN DATES

For a 40 gram serving of dates, there are 7 minerals consisting of:

Potassium

Manganese

Copper

Zinc

Magnesium

Calcium

Iron

“The True Value Behind Aziz Organic Dates”

Aziz Dates are not just ordinary dates — they are a premium organic product, grown under strict supervision and passing through meticulous processes from cultivation to packaging. This is what makes the difference in price:

1. Quality Classification by Skin Separation

- Premium Grade
 - Skin separation: 0% – 5%
 - Appearance: Whole dates, skin firmly attached, elegant look.
 - Usage: Export, luxury gifts, and customers seeking the highest quality.
- Very Good Grade (Class A / Standard Premium)
 - Skin separation: 5% – 15%
 - Appearance: Dates maintain their natural shape with slight skin separation.
 - Usage: Daily consumption, restaurants, and local & international markets at a lower price than Premium.

2. Precision in Sorting & Packing

- Dates go through multiple stages of harvesting and manual sorting.
- Each date is carefully hand-selected.
- The percentage of non-suitable dates in packaging does not exceed 1%, ensuring customers receive dates almost entirely free of defects.

3. Washing & Cleaning

- Dates undergo thorough washing and cleaning before packaging.
- Result: A clean, healthy product suitable for premium storage and consumption.

4. Testing & Quality Control

- Aziz Dates are 100% organic, undergoing full and regular inspections to ensure compliance with health and organic standards.
- For export, each shipment passes an additional comprehensive inspection to guarantee the highest levels of quality and food safety.

5. A Different Quality Standard

- What we classify on our farm as Classic Standard, many other companies market as Premium.
- This means that our “standard” is equivalent to the “premium” level in the wider market.
